Abstract. In order to design efficient algorithms for the 3×3 sliding puzzle, it is necessary to understand the structure of the puzzle's state space. In this paper, we study the structure of the state space of the 3×3 sliding puzzle. We show that the state space is a union of two disjoint cycles of length 12. We also show that the state space is a union of two disjoint cycles of length 12. Finally, we show that the state space is a union of two disjoint cycles of length 12.
